Press Release

Clinvet and Telemark Veterinary Consulting are pleased to announce a collaboration in order to consolidate Clinvet's position as a premiere global Animal Health solutions provider.

TelemarkVet will be working with Clinvet to:

- Provide scientific input into design, assistance with protocol writing, data collection, in-life trouble shooting, data interpretation, and assistance with final study report writing;
- Assist with regulatory discussions;
- Assist with vendor/subcontractor selection and management;
- Provide recommendations for improved/expanded processes and capabilities.

Jonathan Hare, DVM, PhD (Principal of TelemarkVet) said, "We believe that Clinvet has the leadership, facilities, team, and vision to become the CRO of choice and a global solutions provider for the Animal Health industry. We're excited to be able to leverage our years of experience in both CRO leadership, as well as the conduct and monitoring of Animal Health regulatory studies, to help support Clinvet's endeavor in the US market."

Josephus Fourie, PhD (Vice President, Scientific Operations) said, "We are delighted to have TelemarkVet on board to assist us with the regulatory landscape, specialized scientific knowledge and product development know how in the US market. We are looking forward to a fruitful collaboration to broaden our scope of services and knowledge specially in pre-clinical and target animal safety areas."

About Clinvet: Clinvet and its partner companies have been providing research solutions and services to the animal health industry since 1999. A group of partner companies enables Clinvet to provide a wide range of related services in support of laboratory and clinical trials performed on veterinary health products for the animal health sector. With a wealth of experience, Clinvet has for many years been able to support leading animal health companies in ground-breaking research and clinical development programs. (www.clinvet.com)

About TelemarkVet (Jonathan Hare, DVM, PhD and Jennifer Caldwell, RVT, RLAT, MSc): TelemarkVet is dedicated to assisting companies get their animal health products to market and provides new perspectives and partnerships for development strategies. The company has current regulatory experience with CVM/FDA, USDA, VDD, and CFIA. TelemarkVet has a track record of excellence in preclinical and clinical study design and oversight and continuously looks for ways to find efficiencies and add value to the product development journey.
