Your Preferred Research Partner

RESEARCH MODELS

NEW MODELS AND SERVICES

- Poultry vaccines safety & efficacy field studies (CV Morocco)
- Equine Herpes Virus (CV South Africa)
- *Borrelia burgdorferi* (EU field-collected ticks) (CV Morocco)
- *Hyalomma marginatum* model (CV Morocco)
- Collaboration with TRS on *Dirofilaria* studies (CV USA)
- *Leishamia* field model (Clinglobal Greece)
- Natural infection parasite studies (Clinglobal Mauritius)
- Canine Anxiety model (CV South Africa)

MODELS AND SERVICES WE ARE WORKING ON

- Canine Dermatitis (CV South Africa)
- *Echinococcus granulosus* (CV Morocco)
- High-throughput in vitro parasite screening (nematodes, fleas and ticks) (collaboration with INVENesis CH & FR)
- *Dirofilaria* model (EU-sourced strains) (CV Morocco)
- *Angiostrongylus vasorum* model (UK- and IT-sourced) (CV Morocco)

NEW PARTNERS

COLLABORATION

We have established a strong collaboration with Dr. Jonathan Hare (DVM, PhD) and Jennifer Heathcote (RVT, RLAT, MSc (hons)) from Telemark Vet Consulting.

The addition of Telemark Vet Consulting's experience, expertise, and networks boosts Clinglobal's capabilities across services and geographies.

This collaboration allows our customers to get a comprehensive support with their studies – from conception through to reporting.

Our sites and animal colonies can now serve more study needs and address more customers' requests, an improvement that translates into more and better Animal Health products.

- Over 35 years of experience in VMP development
- Deep knowledge in Veterinary Pharmacology
- Experts in Target Animal Safety (TAS), Bioequivalence, PK and PD study design
- Regulatory strategy

NEW PARTNERS

STRATEGIC PARTNERSHIP

We have entered into a strategic partnership with Animal Clinical Investigations (ACI), a CRO with over 20 years of experience in clinical trials and translational medicine in North America to:

- > **bring together well-established and complementary pre-clinical and clinical services to offer continuity for R&D efforts;**
- > **provide customized AH and translational product development R&D solutions, from single studies to start-to-finish NPD;**
- > **enhance project/portfolio management capabilities for new start-ups and biotech;**
- > **expand capacity and capability for large Animal Health companies focused on NPD and life cycle management;**
- > **facilitate opportunities for human health companies to explore the potential and manage the risk related to new chemical and biological entities through pre-clinical and clinical animal disease models.**

Deep knowledge and in-house capabilities in the science and regulation of animal health pharmaceuticals, parasiticides, and biologicals to meet Sponsor needs!

NEW PARTNERS

We have built a solid collaboration with the International Livestock Research Institute (ILRI) in Nairobi, Kenya.

With Clinglobal's expertise in contract research services, GxP and project management, our clients have now access to ILRI's facilities in Nairobi and the Kapiti Research Station, their teams and know-how.

> Quarantine unit

> From grazing paddocks to BSL2+ facilities for large animals

> In-house Laboratory

|-----------------|--|---------------------------|
| > Expertise in: | African Swine Fever | Malignant Catarrhal Fever |
| | Contagious Bovine Pleuro Pneumonia | East Coast Fever |
| | Contagious Caprine Pleuro Pneumonia | Trypanosomiasis |
| | <i>Rhipicephalus appendiculatus</i> | Aflatoxin |
| | Peste des Petits Ruminants | Environmental Research |
| | Rift Valley Fever | New models development. |
| | Food & Mouth Disease | |
| | <i>(inc. genetic variation in responses to FMD vaccines in cattle)</i> | |

RECAP

**We are a science-based and quality-driven group dedicated to accelerate innovation in Animal Health
by providing solutions to the global R&D community
through a network of internal and external strategic specialized partners**

In collaboration with our Research Sites we offer various Research Models and Services
in the following areas:

- Production animals
- Companion animals
- In Vitro & In Vivo screening
- Preclinical studies (toxicology, TAS, ADME)
- Clinical field trials
- Regulatory strategy
- Data management
- Statistics
- Molecular biology
- Contract, project and program management
- Monitoring
- Scientific writing
- Contract quality assurance
- Rodenticides, pesticides and repellence research
